

## Who Eats Who?

## Jaws

This game will feature Felix swimming away from the down right dirty dogfish. Felix got knocked out by an accomplice of the culprit and dumped off about 1 km away from New Rockshore to be eaten. Felix woke up and remembers he made a breakthrough on the case but sees a dogfish quickly swimming towards him. The user will have to make Felix eat plankton (the green dot) to regain life, and hide in coral otherwise the dogfish will eat him.

After a question in the order of:

- Describe the creatures body.
- How many legs does the creature have?
- Describe the creatures facial structure.
- More Questions

When a question is asked the user will eliminate creatures from the list until there is only one left. (Note: when the user hovers their mouse more creatures will fill the screen.)

When hovering the mouse over "Previous and Current questions" a box will come into view with said Q's and A's.
